

# ICT INFRASTRUCTURE

The internet is well developed in terms of high internet penetration, household internet access penetration, number of ISPs and number of hosts per inhabitant. Internet access costs are not high and flat rate internet access is available for residential users.

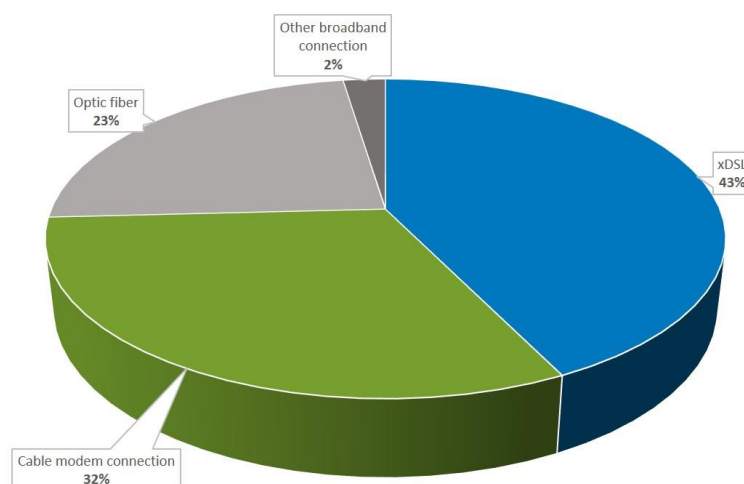

## *Information society overall Slovenia 2015 overview*

Share of households owning a computer (desktop, portable, tablet or handheld computer)	78%
Share of individuals using the Internet regularly	73%
Share of e-buyers	39%
Share of companies having a profile on social media	41%
Share of companies using cloud computing services	17%
